

Responsible Investment Statement

VT Gravis Digital Infrastructure Income Fund

Impact

The Fund selects investments in listed securities that own the vital physical assets supporting the digital world.

Through investing in companies focused on this theme the Fund benefits society by providing crucial infrastructure, predominantly supporting the objectives of Sustainable Development Goal 9 in particular (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation).

Additionally, investing in companies focused on this theme may limit the controversial activities a company may be involved in. However, it is recognised that all activities of the company need to be examined. The following policy sets out how the Fund screens the investible universe and addresses potential issues.

If a company within the Fund is found to be in breach of this policy at any point, this company will be divested in a timely manner, likely to be within six months and preferably within three months.

ESG

Environment

Attention will be given to the environmental performance of the selected investments. For an investment to be deemed suitable for the Fund, it must demonstrate a commitment to environmental improvements, through policy, management systems or positive products.

Consideration will also be given to potential negative incidents and environmental controversies, including pollution events and environmentally related fines.

The environmental credentials of a company will be examined when assessing an investment, with a focus on the environmental performance of the companies' underlying assets.

Social

In selecting suitable investments consideration will be given to the management of social impacts, including:

- Community impacts
- Labour rights
- Supply chains and modern slavery

Governance

In selecting suitable investments, consideration will be given to governance issues including:

- Company ownership and control structure
- Remuneration of board members
- Taxation
- Corruption & Bribery (including fraud and market manipulation)

Avoidance of Controversial Activities

The Fund will avoid investment in companies with significant involvement in controversial activities. A company will be viewed in relation to its activities, rather than those of its tenants, with the expectation being that the company will conduct screening on the underlying tenant.

- Controversial activities include significant involvement in: armaments, alcohol, gambling, pornography, non-medical animal testing and tobacco. Significant involvement is defined as greater than 5% of revenue.
- Companies with ongoing or persistent involvement in human rights abuses will be avoided.
- No involvement in the production of coal or oil is acceptable. No involvement in production of power from nuclear fuel is acceptable. Companies indirectly involved in the nuclear industry, such as providing maintenance and services, are acceptable.
- The Fund managers reserve the right to avoid investment in other activities not listed above where they are also deemed in conflict with the overall Fund aim.

Responsible Ownership

For detail on engagement and voting activities please see the [Gravis Advisory Limited Voting & Engagement Policy](#). The Fund will undertake the systematic use of voting rights in line with this, utilising voting research from ISS in line with their Sustainability Proxy Voting Guidelines.

Other notes

Newly listed companies (e.g. via Initial Public Offerings) will have a grace period of up to twelve months, to resolve issues regarding governance and reporting which may prevent a full assessment of the company under the above policies.

Responsibilities and Governance

Adherence to this statement will be overseen by the Lead Adviser to the Fund, with the input of specialist third-party, as well as by the Authorised Corporate Director (“ACD”) and Valu-Trac Investment Management Ltd. A regular review of this statement will be conducted, and updates undertaken to ensure best practice is followed.
